About This Test

The PT/INR (Prothrombin Time/International Normalized Ratio) test measures how well and how quickly your blood clots. PT assesses the time it takes for blood to clot by measuring the activity of clotting factors in the blood. The INR is a standardized ratio derived from the PT, allowing for consistent interpretation across different laboratories. This test is commonly used to monitor patients on anticoagulant medications like warfarin, assess liver function, and evaluate bleeding or clotting disorders.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
