Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 2 Days

Specimen Required: Blood

Price- ~~₹1499~~ **₹599**

Parameters Included

About This Test

Rubella virus IgG avidity measures the strength of IgG antibodies binding to rubella antigens, helping to determine the timing of infection. High-avidity antibodies indicate past infection, while low-avidity antibodies suggest a recent infection. This test is particularly important for pregnant women, as a recent rubella infection can lead to congenital rubella syndrome (CRS), causing severe birth defects. By assessing IgG avidity, healthcare providers can make informed decisions regarding treatment and management, especially for high-risk groups.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
