SERUM IGE- TOTAL SERUM IGE (IMMUNOGLOBULIN IGE)

Profile Details | 1 Parameters

Fasting: Fasting is not Manda | Report Time: Same Day

Specimen Required: Blood

Price- ~~₹995~~ **₹499**

Parameters Included

About This Test

A serum IgE test measures the level of immunoglobulin E (IgE) antibodies in the blood. IgE is primarily associated with allergic reactions and responses to parasitic infections. Elevated IgE levels can indicate allergic conditions such as asthma, hay fever, eczema, and food allergies. It can also signal parasitic infections or certain immunological disorders. The test helps diagnose and manage allergic diseases by identifying heightened immune responses to specific allergens, guiding treatment plan and monitoring the effectiveness of interventions like allergen avoidance or immunotherapy.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
