

SERUM IGG4 LEVEL

Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Within 4 Days

Specimen Required: Blood

Price- ₹10000 **₹4999**

Parameters Included

About This Test

A serum IgG4 level measures the amount of Immunoglobulin G4 (IgG4) antibodies in the blood. IgG4 is a subclass of IgG antibodies, which play a crucial role in the body's immune response. Elevated levels of IgG4 can indicate conditions like IgG4-related disease (IgG4-RD), an autoimmune disorder causing inflammation and tissue damage. Testing for serum IgG4 levels helps diagnose and monitor this disease, distinguishing it from other similar inflammatory and autoimmune conditions.
