About This Test

SGPT (Serum Glutamate Pyruvate Transaminase), also known as ALT (Alanine Aminotransferase), measures the level of the enzyme ALT in the blood. This enzyme is primarily found in the liver and is released into the bloodstream when liver cells are damaged. The SGPT test is used to assess liver function and diagnose liver conditions such as hepatitis, cirrhosis, and liver inflammation. Elevated SGPT levels indicate liver damage or disease, guiding further diagnostic and treatment decisions.
