About This Test

A sputum AFB (Acid-Fast Bacillus) test measures the presence of acid-fast bacteria, primarily Mycobacterium tuberculosis, in the sputum. This test is crucial for diagnosing tuberculosis (TB) and monitoring the effectiveness of TB treatment. Sputum samples are stained and examined under a microscope for AFB. Positive results indicate TB infection or other mycobacterial infections, necessitating further medical evaluation and treatment to prevent spread and ensure proper patient care.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
