THEXPERTLAB THALASSEMIA PROFILE

Profile Details | 4 Parameters

Fasting: Fasting is not mandatory | Report Time: Next Day

Specimen Required: Blood

Price- ~~₹2200~~ **₹1190**

Parameters Included

- CBC-complete blood count
- HPLC HbA2- Beta Thalassemia Screening-HB Electroph...
- Iron Profile
- Peripheral Blood Smear- PBS / PS

About This Test

A **thalassemia profile** measures various indicators to diagnose and assess thalassemia, a genetic blood disorder affecting hemoglobin production. It typically includes: **Complete Blood Count (CBC):** Assesses red blood cell count, hemoglobin levels, and mean corpuscular volume (MCV), often showing microcytic anemia. - **Hemoglob Electrophoresis:** Identifies abnormal hemoglobin types specific to thalassemia. - **Iron Studies:** Differentiates thalassemia from iron deficiency anemia by measuring serum iron and ferritin levels. - **Genetic Testing:** Detects mutations in genes responsible for thalassemia, confirming diagnosis and determining the disorder's type and severity.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within Next Day*
