Profile Details | 1 Parameters

Fasting: Fasting is not Mandatory | Report Time: Same Day

**Specimen Required:** Blood

Price- ₹750 **₹390**

## Parameters Included

### About This Test

The Toxoplasma IgM antibodies test measures the presence of IgM antibodies in the blood, which are produced in response to a recent or acute infection with the Toxoplasma gondii parasite. The presence of IgM antibodies indicates a current or recent infection, as these antibodies typically appear soon after exposure and decrease over time. This test is crucial for diagnosing acute toxoplasmosis, especially in pregnant women and immunocompromised individuals, to prevent potential severe complications from a recent infection.

**98% On-Time Reports**
