

TUMOR NECROSIS FACTOR - TNF ALPHA

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 3 Days

Specimen Required: Blood

Price- ₹4800 **₹3990**

Parameters Included

About This Test

The Tumor Necrosis Factor (TNF) test measures the concentration of TNF, a cytokine involved in systemic inflammation, in the blood. TNF is produced mainly by macrophages and plays a key role in the immune response, including cell signaling, apoptosis (cell death), and the inflammatory process. Elevated TNF levels are associated with chronic inflammatory diseases such as rheumatoid arthritis, Crohn's disease, and certain cancers. This test helps diagnose and monitor these conditions, guiding treatment decisions and assessing disease activity.
