VITAMIN B12 CYANOCOBALAMIN

Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Same day

Specimen Required: Blood

Price- ~~₹999~~ **₹499**

Parameters Included

About This Test

Vitamin B12 measurement assesses the level of vitamin B12 in the blood. This vitamin is crucial for nerve function, red blood cell production, and DNA synthesis. Deficiency can lead to anemia, fatigue, weakness, and neurological issues. The test helps diagnose deficiencies, which may be caused by poor dietary intake, absorption issues (like pernicious anemia), or certain medical conditions. Normal levels generally range from 200 to 900 picograms per milliliter (pg/mL). Early detection through this test is important for preventing irreversible damage, especially to the nervous system. Regular monitoring might be necessary for individuals at risk, such as the elderly, vegetarians, or those with gastrointestinal disorders.
