WEIL FELIX TEST

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 5 Days

Specimen Required: Blood

Price- ~~₹1600~~ **₹849**

Parameters Included

About This Test

The Weil-Felix test is used to detect Rickettsial infections by identifying the presence of specific agglutinins (antibodies) in the blood that react with certain proteus bacter antigens. This test is based on the fact that some Rickettsia species share antigens with the Proteus bacteria, leading to cross-reactivity. **Key Points:** - **Diagnosis of Rickettsial Infections:** The test helps diagnose rickettsial diseases such as typhus and Rocky Mountain spotted fever. - **Detection of Cross-Reactive Antibodies:** It detects antibodies that react with Proteus antigens, which may be present due to a Rickettsial infection. - **Confirmatory Test:** It is often used alongside other diagnosti methods to confirm rickettsial infections. The Weil-Felix test is valuable in diagnosing infections when other methods are inconclusive or unavailable.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within Within 5 Days*
